

29 January 2018

To whom it may concern.

Kleinskool is an informal settlement with a vast squatter camp on the banks of the Chatty River. The community consists of a mixture of Xhosa and Koi (Coloured) cultures. Unemployment, poverty, drug and alcohol abuse are at the order of the day in this area. The children suffer the most. They are neglected and abused. They crave attention and love. Many suffer from depression and because of lack of proper nutrition concentrate badly at school. They receive very little help from parents with homework supervision. The result is that they fall behind which makes them feel more incompetent and useless.

Our organization assists children in Kleinskool area. Our main focus is on education. We assist and encourage children to complete their school education by providing them with school fees, school clothes, stationeries, transport fees etc. We control this very closely, work alongside the various schools, and receive the children's report cards every term.

We also feed about 400 children on a Friday when we have a children's church in a nearby church building. All this is managed by donations from the public.

During the weekend we teach extra classes in mathematics. This year we will have tutors assisting with Afrikaans, English, History and Geography during the week. Our main aim is to encourage the children with potential to attend a tertiary college or university after matric. If they do not manage to complete matric we assist them to do short courses at the "Work for a Living" program where skills such as merchandising, office management, cashier and computer literacy are taught.

Due to the gang violence in the northern areas, we encourage senior students to attend schools in areas further away from the center of those activities. Not only are these schools safer but classes are slightly smaller. This results in better tuition. These schools, although very reasonable, are not entirely free. We include an estimated cost for 2018 in one of the two schools we recommend to our children. This will give you an idea of the financial assistance we need.

At the moment nine children attend the “better “and more costly senior schools. Due to our financial constraints more than twenty children still attend different schools in the northern areas as these are basically free. We place children in the better schools according to their scholastic performance and our financial position.
